Jim Hicks, 17 Years of Lending a Hand

Jim Hicks first learned of California Foundation for Agriculture in the Classroom (CFAITC) 17 years ago, when he picked up a pamphlet during his travels in the fertilizer industry. “I knew, right then, that this organization was the answer. I’ve been fond of Ag in the Classroom from day one,” said Hicks, who, since his discovery, has been among Ag in the Classroom’s most loyal supporters.

In June, during the National Ag in the Classroom Conference in Orange County, Hicks stopped by to see for himself how his support is impacting teachers. He volunteered in the “CA Grown Zone,” chatting and handing out fresh produce to educators from across the country. “I was amazed at the quality and the scope of the organization, and was equally impressed by the teachers who were there and by their desire to learn about the industry,” he said.

Hicks is owner and manager of Jim Hicks & Company, a widely successful and respected wholesale distributor of commercial fertilizers in Brea, California, where his two sons, Pat and Grady are also part of the family business. “The biggest problem facing agriculture today, is that we are coming up on second and third-generation Americans who have no idea where their food comes from,” he said. The generous contributions made by Jim Hicks, and every donor to Ag in the Classroom, help to reverse this growing trend.

The 2008 California Farm Bureau Federation’s CFAITC Conference Draws a Crowd

This past June 25-28, California hosted the National Ag in the Classroom Conference for the first time in 16 years. More than 350 educators, nutritionists, volunteers and state officials from 49 states, including Superintendent of Public Instruction Jack O’Connell, and Secretary of Food and Agriculture A.G. Kawamura, gathered in Costa Mesa to attend the annual event.

During his remarks on June 27, O’Connell commended the audience of educators for their dedication to bringing agricultural education to today’s students. “We’ve laid a solid foundation for the study of agriculture to thrive in our classrooms,” he said.

The California agriculture industry and many Agriculture in the Classroom donors helped make the conference a success by providing a generous array of auction items, wines, and flowers, and more than $4,000 worth of fresh California produce.

Support from Health Net is Above Par

On Monday, May 12, 2008, nearly 100 California golfers teed-off to support agriculture education at the prestigious Granite Bay Golf Club. Health Net, Inc., one of the nation’s largest publicly traded managed health care companies, served as the Signature Sponsor of the annual golf tournament benefiting CFAITC.

“Health Net’s goal to improve health and well-being of each of us,” said Ag in the Classroom Executive Director, Judy Culbertson. “Money raised through our activities make the conference a success for the students. We are California Foundation for Agriculture in the Classroom (CFAITC). Our mission is to increase awareness and understanding of agriculture among California’s educators, our students. Our vision is an appreciation of agriculture by all. We are a 501 (c)(3) organization. (800) 700-AITC (2482) WWW.CFAITC.ORG

The annual contest inspired more than 10,000 agriculturally-themed essays to be written in 2007. Each year, six student authors are selected for their original stories and honored with special awards and recognitions. The stories are illustrated by high school students and published as a soft bound book, highlighting the students' achievements.

On Monday, May 12, 2008, nearly 100 California golfers teed-off to support agriculture education at the prestigious Granite Bay Golf Club. Health Net, Inc., one of the nation's largest publicly traded managed health care companies, served as the Signature Sponsor of the annual golf tournament benefiting CFAITC.

"Health Net's goal to improve health aligns with our goal of educating students about the importance of agriculture in our society, our economy and in the personal health and well-being of each of us," said Ag in the Classroom Executive Director, Judy Culbertson. Proceeds of the tournament support the development and distribution of resources, programs and training opportunities that help foster an appreciation for an industry that provides safe, abundant and affordable products, and a strong economy.
Summer 2008

Welcome To Hands On Ag!

We are pleased to again provide this newsletter for friends and supporters of California Foundation for Agriculture in the Classroom, aimed at presenting news, program updates, and general information, as well as expressing our gratitude for all you do.

Your generosity has allowed us to reach more than 11,000 educators in 40% of California’s schools through our programs and resources. By helping classroom teachers recognize the importance of our food and fiber production, we are essentially passing this message on to our students, the next generation of consumers, voters, employers and parents.

Thank you for sharing this vision with us and taking the time to support Agriculture in the Classroom. We look forward to sharing our progress with you, as you continue to turn our goals into reality. Thank you very much for your support.

Sincerely,

Judy Culbertson, Executive Director
