Fantastic Fact:
The first commercial crop of pistachios in California was not harvested until 1976 and now California produces 99% of the United States’ pistachio crop.

- *Imagine this...* State Winners Announced
- Get Popping and Celebrate National Popcorn Day!
- More ways to #LearnAboutAg!

Visit our blog #LearnAboutAg@Home for daily activities to incorporate agriculture into your classroom in person or virtually!

Nuts are the Taste and Teach Commodity for January. Watch this video from the Almond Board of California to #LearnAboutAg and discover the journey an almond takes from the orchard to you!

Congratulations to the State Winners of the *Imagine this...* Story Writing Contest!

California students in grades 3-8 creatively explored where their food and fiber comes from by writing narrative stories. The state-winning stories from each grade level are being illustrated by high school art students and will be published in our annual story book, *Imagine this...* Stories Inspired by Agriculture which will be released during National Agriculture Week in March.

Let’s Eat Healthy Educator Recognition Program

Dairy Council of California’s Educator Recognition Program identifies, engages and celebrates California educators who proudly advocate for the health of their students and school community through nutrition education. The program also includes an award component, the Let’s Eat Healthy Leadership Award, which allows educators who embody the spirit of the program to be recognized by their peers and partners for demonstrating outstanding advocacy.

Learn more about the program, last year’s Let’s Eat Healthy leaders, and how to nominate and recognize an advocate by visiting HealthyEating.org/NutritionAdvocacy. The deadline is February 1, 2021.

Teacher Feature

Julie Brackx
Grades taught: 3
School: Pioneer Elementary School
County: San Diego County

How and when did you first learn about Ag in the Classroom?
I first learned about the California Foundation for Agriculture in the Classroom from the Cooperative Extension in San Diego. I was able to attend my first conference in San Mateo back in 2003. Since then, I have continued to attend the annual conferences as I am able and have participated with various other AITC programs and resources.

How long have you been teaching students about agriculture?
I have been teaching agriculture for more than 17 years! Being a biology major as an undergrad student, I’ve always had a love for science and nature. I helped start the garden at my school to bring hands-on learning experiences to life for the students. Every year, I start off with a craft and writing project I learned about at a CFAITC conference years ago, “If it weren’t for farmers.” Kids sometimes think food and clothes just magically appear at stores! They are surprised to learn the journey it takes for goods and crops to be be grown/raised, harvested, etc. before ending up on store shelves. I enjoy sharing all of these agriculture experiences with them.
What is your favorite AITC program/resource/event and why?
My favorite event is the annual conference. Not only do you learn new things, you meet lots of great people and leave with oodles of resources for your classroom!

Describe an agriculture-based project you have been involved in lately.
I have been participating recently with the Taste and Teach Program. This is such a wonderful opportunity to introduce various fruits, vegetables and other produce to students that might not otherwise have the chance to experience them. I like to find a read aloud book or story, and then pair it with fun activities that go along with each month’s featured item.

Do you have any advice for other teachers on how to implement agriculture into their classrooms?
Agriculture is a great way to introduce many different subjects to your students including: math, science, nutrition, and language arts. Once you start looking, you will find all kinds of fun and creative ways to make agriculture come to life for your class!

Get Popping!
Are you looking for a way to pop off the new year in your classroom?!

Celebrate National Popcorn Day on January 19 with your students by using this phenomenon-based lesson plan for grades 3-5, Get Popping, developed by our friends at National Center for Agricultural Literacy!

State Farm® Teacher Assist
Deadline: January 15, 2021
The State Farm® Teacher Assist program is giving away $500,000 to teachers throughout California, Texas, Florida, and New York. Forty teachers in each state will win a $2,500 grant to implement their innovative ideas.

The submission period opens on January 11 and ends January 15 or when 200 submissions are reached.
