

CALIFORNIA FARM DAY

APRIL 1,
2022

More than 16,000 students learned about California's "99% Club!"

"Thank you so much for this opportunity! The students (and I) enjoyed learning fun facts, seeing the commodities, and listening to farmers. It's great to see how much California agriculture contributes to our economy!"

"My students learned a lot from Farm Day. Some didn't know what a pistachio was or that raisins were once grapes. Many students were excited to tell their parents that they want to try a kiwi."
