Where Your Food Grows

Match Your Meal!
Draw a line from the ingredient to the commodity it comes from.

<table>
<thead>
<tr>
<th>Food ingredient</th>
<th>Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beef Patty</td>
<td>Tomato</td>
</tr>
<tr>
<td>Bun</td>
<td>Beef Cattle</td>
</tr>
<tr>
<td>Ketchup</td>
<td>Wheat</td>
</tr>
<tr>
<td>Cheese</td>
<td>Cucumber</td>
</tr>
<tr>
<td>Pickle</td>
<td>Dairy Cow</td>
</tr>
<tr>
<td>Diced Onions</td>
<td>Potato</td>
</tr>
<tr>
<td>French Fries</td>
<td>Onion</td>
</tr>
</tbody>
</table>

What California county does your food come from?
Use the map to identify a county where each ingredient is grown. Write the name of the county on the line.

- Buns____________________
- Beef___________________
- Milk___________________
- Apples_________________
- Pickles________________
- Onions_________________
- Lettuce________________

Fun Facts

- Did you know that 25% of an apple's volume is air? That's why apples float in water!
- McDonald's has served over 2 BILLION packages of Apple Slices since 2004.
- Americans consume an average of 30 pounds of lettuce per year.
- Because of California's climate, McDonald's lettuce grows nearly all year long in California.
- It is recommended to eat 3 servings of vegetables and 2 servings of fruits each day.
- Did you know that California grows nearly 1/2 of the fruits and nuts and more than 1/2 of the vegetables produced in the U.S.?
- California is the largest farm state in the country and produces more than 400 different commodities.
- Dairy is the #1 commodity produced in California. One cow produces approximately 52,560 cups of milk per year!
