# What is Agriculture in the Classroom®?

The Agriculture in the Classroom® (AITC) program seeks to improve agricultural literacy – the awareness, knowledge, and appreciation of food, fiber, fuel, and natural resource topics – among preK-12 teachers and their students. We strive to improve student achievement by applying authentic, agricultural-based content as the context to teach core curriculum concepts in science, social studies, language arts, nutrition, and more. By encouraging teachers to embed agriculture into their classroom, AITC cultivates an understanding and appreciation of the food and fiber system that we all rely on every day.

The Colorado Foundation for Agriculture, a 501(c) 3 nonprofit education corporation, administrates Colorado's Agriculture in the Classroom program and serves as the state contact for the National Agriculture in the Classroom Organization. The Colorado Foundation for Agriculture and the Agriculture in the Classroom program are unique within the agricultural education community as the lead organization to serve the full spectrum of preK-12 formal education.
