Label the parts of the sunflower!

#1
The outer circumference of the flower head.

#2
The outer ring of flowers around the sunflower head.

#3
Sunflowers have this deep system that is large and complex to anchor the plant. This system collects nutrients, gather water, and provide strength.

#4
The entire head of the sunflower.

#5
The center of the flower that makes delicious seeds.

#6
This supports the plant and leaves and transports water and nutrients around the plant.

#7
The seed's outer layer.

#8
Crack open the seed coat to get to this.
