

Chicken

Female chickens are raised on farms and produce eggs.

#1

Chicken Coop

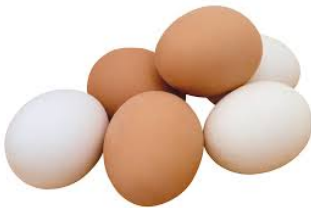

Chickens live in houses called, “coops.” They drink fresh water and eat a mixture of grains such as corn or wheat.

#2

Eggs

Female chickens lay about 1 egg per day. Eggs shells can be many colors such as white, brown, or even green.

#3

Egg Carton

After eggs are collected from the chicken coop they are washed and placed in a carton to be ready to sell.

#4

Semi Truck

After the eggs are packaged, they are loaded on a truck and delivered to a store.

#5

Grocery Store

Eggs are usually purchased at a grocery store. They can be eaten boiled, scrambled, or in some of our favorite foods such as cookies or cake.
