

Weaving Instructions

1. Cut a rectangular piece of cardboard to your desired size. Use scissors to cut 1/4" slits 1/2" apart along two opposite ends of the cardboard.

2. To create the warp on the loom, tape one end of the string to the back of the cardboard. Then string it through the first notch around the front of the cardboard piece from top to bottom and into the opposite notch. Place the string behind the back of the cardboard and out the next notch. Continue until all of the notches have been filled. Tape the second end of the string to the back of the cardboard.

3. Tie several strands of the spun wool together to make one long piece. Use the spinning hook from the wool spinning kit as your shed stick. Feed it over and under the warp with every second string being raised. Weave the yarn across the loom following the pattern of the shed stick.

4. To weave the second row, feed the shed stick in the opposite over under pattern from the previous row and follow the pattern with the yarn. Use the shed stick to gently push each row together.

5. When the weaving is finished, insert a twig or dowel above and below the woven piece. Detach the string from the cardboard notches and tie the loose ends to the twigs. An extra piece of yarn can be tied to the top twig for hanging.
