

Name: _____

The Lifespan of Overfishing Student Data Table

Fill in the data tables as your group fishes each year. When your group has fished for four years, create a graph that shows how the fish population in your ocean has changed over time. Use one color to show the start of each fishing season and a different color to show the end of each fishing season.

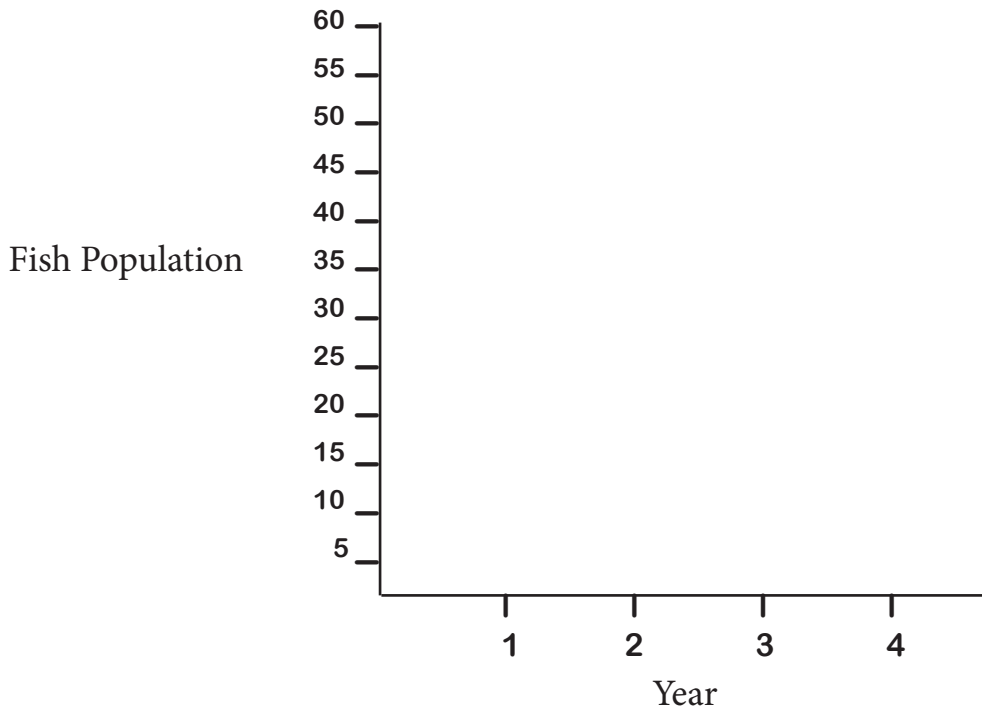

Number of fish in the ocean:

	Year 1 Start	Year 1 End	Year 2 Start	Year 2 End	Year 3 Start	Year 3 End	Year 4 Start	Year 4 End
Yellow								
Red								
Green								
Orange								
Total								

Value of fish caught:

	Year 1 Income	Year 2 Income	Year 3 Income	Year 4 Income
Yellow (\$2)				
Red (\$5)				
Green (\$5)				
Orange (\$10)				
Total				

Graph below:

		What they eat	\$ Value
	 Orange	Green & Red Goldfish	\$10.00
	 Red	Yellow Goldfish	\$5.00
	 Green	Yellow Goldfish	\$5.00
	 Yellow	Seaweed	\$2.00
