

What technologies make food available in our communities and states?

Transportation

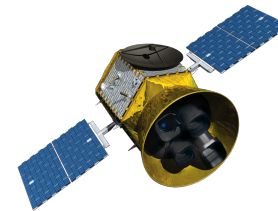

- Trains
- Trucking
- Airplanes

Watch [Banana and Pineapples Journey From Farm to Store](#) to see technologies that transport food from farm to table.

Communication

- Satellites
- Phones
- Internet

Watch [Satellite Applications in Farming and Agriculture](#) to see how satellites and communication improve agricultural efficiency and productivity.

Food Preservation

- Refrigeration
- Food preservatives
- Food storage Facilities

Watch a [video about apple storage](#) to see technologies that keep apples fresh for up to a year after they were picked.

Farm Technology

- Irrigation
- Improved plant varieties for different climates
- Improved animal housing facilities to adjust to climates

Watch [Climate Controlled Barns](#) to see several technologies that allow livestock animals to thrive in hot/cold climates.
