

Salt Mine Tour - Video Notes

Name:

1. What are the main differences between refined table salt and Redmond Real Salt?
2. How was the Redmond salt deposit formed?
3. Why did the salt remain so close to the surface?
4. Why is Redmond salt red?
5. Why did they decide to start mining using Room and Pillar mining?
6. What ancient sea left the salt deposit? What evidence do they see in the mine that tells them that the salt has been pushed up?
7. What does Redmond do or look for to mine “culinary salt?”
8. In the boxes below, sketch out the 4 different sizes of salt and label them.
