

APHIDS TAKING OVER YOUR GARDEN?

MEET THE LADY BEETLE!

Lady beetles are natural predators that feed on aphids and other soft-bodied pests that damage your plants!

(Lady Beetle larvae are even hungrier than adults!)

HIRE NATURE'S PEST CONTROL TEAM!

Why Choose Lady Beetles?

- ✓ Eat up to 50 aphids per day
- ✓ Safe for people, pets, and pollinators
- ✓ No chemical sprays needed
- ✓ Work naturally in gardens and landscapes
- ✓ Help maintain a balanced ecosystem

Best for Controlling...

- **X** Aphids
- **X** Whiteflies
- **X** Scale insects
- **X** Mites

SPECIAL FEATURE:

One lady beetle larva can eat hundreds of aphids before becoming an adult!

They're tiny but they get the job done!

LET LADY BEETLES DO THE WORK!

Protect your plants the **NATURAL** way!

ECO-FRIENDLY ★ CHEMICAL-FREE ★ EFFECTIVE ★ SUSTAINABLE

ASSIGNMENT CHECKLIST:

- My organism is a **predatory biological control agent**
- I explained what makes my organism **effective and unique**
- I created a **clear, catchy title** and message for a specific audience
- My design is **easy to read, visually appealing**, and uses good images & color
- I explained clearly **why this organism is useful**
