

Corn Around the World

Name:

Hour:

Date:

Directions: Use a world atlas. Find thematic maps to show corn or maize production, climate, precipitation, natural vegetation, and soils. Describe the latitude regions of corn production for each continent. Also describe the vegetation, soils, temperature/climate, and precipitation of the world places where corn is grown. (If there is not a specific "corn" map, look for a map of agricultural products.)

CONTINENT	COUNTRIES WHERE CORN IS GROWN	LATITUDE BAND	CLIMATE	ANNUAL PRECIPITATION RANGE	NATURAL VEGETATION	SOILS
1. North America (including Central America)						
2. South America						
3. Europe						
4. Africa						
5. Asia (East and South Asia)
