

Dirt Detectives

Investigate and discover different types of soil and how it can change over time

Directions

1. Read the book and discuss why soil is important for plants.
2. Let kids explore different soil types with magnifying glasses, describing textures.
3. Have kids predict which soil is best for growing plants.
4. Plant seeds in different soils and observe over time.

Supplies

1. Different soil samples (sand, clay, loam, garden soil)
2. Magnifying glasses
3. Small containers
4. Seeds for planting
