HOW IT WORKS

Farmers and other agriculture professionals are on hand to offer demonstrations and mini lessons in their area of expertise. With each one hosting a different station, classes rotate through the stations, spending about 15 minutes at each one creating a diverse agricultural experience.

WHY

School-to-Farm events enable children to learn about the agricultural heritage of our state while building an appreciation for the critical role that our food and fiber systems play in their everyday lives. Agricultural topics can be used to give real life meaning to many core curriculum requirements. Teachers who have participated in the past say this is "one of the best field trips" and "ties in directly with what we cover at school".

WHAT YOU'LL SEE

Students may learn about horticulture, dairy, chickens, soil, fiber, maple syrup, horses, beekeeping, livestock, forestry and a variety of other topics. You never know who or what you'll see!
