

Eat A Rainbow

OVERVIEW: In this lesson, students explore the many different colors of fruits and vegetables and learn why eating a variety of colors is good for them. They work together to brainstorm a list of different-colored fruits and vegetables and keep track of the different colors they eat in a week.

GRADES: 3-5

OBJECTIVES: The student will be able to:

- Identify the names and colors of different fruits and vegetables.
- Identify what the recommended serving of fruits and vegetables is on MyPlate.
- Describe some of the health benefits of eating fruits and vegetables of different colors.

MATERIALS: (for each student)

MyPlate sheet

Eat a Rainbow for a Healthy Body sheet

Eat A Rainbow Fruits and Veggies List blank sheet

For teacher: *Eat A Rainbow Fruits and Veggies List* completed sheet

Optional: Eat a Rainbow Week log sheet

INTRODUCTION:

Give each student a copy of MyPlate. Ask what are the recommended servings of fruits and vegetables at every meal. Ask students whether they eat the MyPlate recommended servings, and if not, how they could increase the fruits and vegetables that they eat. Tell students that today they are going to learn the benefits of eating a rainbow of fruits and vegetables – that it's also important to eat fruits and vegetable of all different colors.

PROCEDURE:

Give each student a copy of the *Eat a Rainbow for a Healthy Body* sheet. Review the sheet with the entire class. Ask students what are their favorite fruits and vegetables and what are their health benefits.

Divide students into small groups. Give each student a copy of the blank *Eat a Rainbow Fruits and Veggies List*. Give the students five or ten minutes to brainstorm and list fruits

and vegetables that fit into the different color categories. Tell the groups to work quietly so that other groups do not overhear their suggestions.

Bring the whole class together and discuss each group's findings. The teacher can use the completed *Eat a Rainbow Fruits and Veggies List* to give hints and have the students guess fruits and vegetables they did not put on their group lists.

EVALUATION:

Ask students to write a paragraph or several paragraphs explaining how many fruits and vegetables they should eat daily and why eating different-colored fruits and vegetables is important for them. Ask them to include in their paragraph examples of different-colored fruits and vegetables that they like to eat.

EXTENSION:

For homework, ask students to log for a week the fruits and vegetables they have eaten to check to see if they are eating a rainbow.

Eat A Rainbow for a Healthy Body

You should eat a rainbow of fruits and vegetables every week to make sure that your body stays healthy and strong. Fruits and vegetables of different colors contain different vitamins and nutrients for different parts of your body.

Red foods keep our hearts healthy. They also improve our memory so we can remember things better and do better in school.

Orange foods are full of vitamin C. Vitamin C helps us fight a cold and helps to prevent cancer. Orange foods are also full of vitamins A and beta-carotene, which help us see in the dark and keep our skin healthy.

Yellow foods are full of antioxidants that fight off dangerous substances that can damage our cells. They also keep our hearts healthy and keep us from getting sick.

Green foods help our entire body: they keep our nails strong, help us see better, keep us from getting sick, give us strong bones and teeth, and keep away cancer.

Blue and Purple foods can help our memory. They also contain flavonoids, which are a type of phytochemical that keep cancer and heart disease away.

White foods help keep our heart, lungs, and blood vessels healthy. They can also lower cholesterol and make our bones strong.

Eat A Rainbow - Fruits and Veggies List

Eat A Rainbow Week

Dear Parents:

Today in class we learned that it was important to eat a rainbow of fruits and vegetables every week. Eating different-colored fruits and vegetables keeps our bodies healthy and helps to fight away sickness.

The students promised to try to eat fruits and vegetables from all colors of the rainbow this week. Please help them fill in the fruits and veggies that they ate, either with pictures or with words.
