Happy September!
Win a free game for the new school year!
It's our Lesson of the Month below.
Click [here](#) to enter our drawing.

Lesson of the Month

Search for the Source
Grades K-12
What is the source of the things we use in everyday life? In this game, students try to identify where everyday objects come from: a store, a factory, a farm

or natural resources.
What's the lesson? There are only two sources: everything comes from the farm or from natural resources.
We have versions of the lesson for all grade levels K-12. You can download the pictures of the source search objects and watch a video of how the game is played. Click [here](#) to find everything you'll need.

See us at the NJ Science Convention

New Jersey Agriculture in the Classroom will be hosting a booth at the New Jersey Science Convention on October 15 and 16 at the Princeton Marriott at Forrestal.

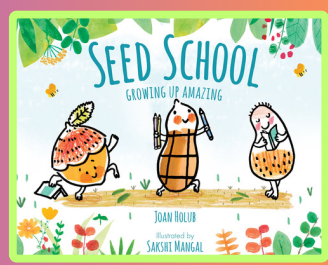

NJAITC will also be presenting a workshop on New Jersey farming and climate change at the convention. The workshop will highlight our new unit on climate

change, which is aimed at teaching students in grades K-5 the reasons for climate change and its impact on agriculture in our state. You can check out the entire unit of lessons [here](#).

Library Corner

Seed School
Growing Up Amazing
By Joan Holub

At Seed School, seeds of all shapes and sizes learn what they need to know to grow up and become plants. In P.E. they chant "stems up, roots down!" and Principal Bee teaches them about pollination. Click [here](#) to see all of our activities to accompany this fun and engaging book. For grades K-3.

Be sure to stop by our booth to say hello and see all that NJAITC has to offer teachers. And we'd love to see you at our workshop!
