6,744 Students Exposed to Grow Systems

NINETEEN GROW SYSTEMS AWARDED

Eight 2445 Organics SuperGrow Systems
Two Garden Cubes
Eight Tower Gardens
One High Tunnel

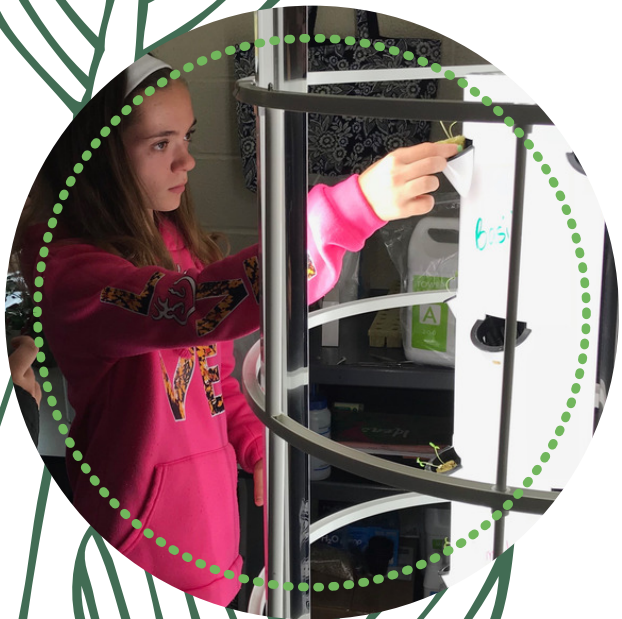

Extending the growing season!

The grow systems provided by New York Agriculture in the Classroom have allowed students to grow lettuce, strawberries, tomatoes, basil, radishes, snow peas, spinach, and more!

"The students get really excited to see the plants grow and to be able to eat what they have grown themselves" - Karen Rost, PS 59

"It is a perfect addition to our school and gives us a chance to collaborate with colleagues across curriculum, age level, and learning ability." -Melinda Martin, Morristown Central School

"This was a great way to break barriers and help the students relate concepts from biology to something very real and tangible in their own lives." -Jennifer Dimarco, Flushing High School
