

What Is A Farmer?

- Farmers produce a variety of food products for human and animal consumption.
- From farmers who raise animals to farmers who grow crops.
- The farmer's main goal is to produce a good crop and/or healthy animals in order to make a living and to feed the population.
- They are responsible for all crops and livestock that are needed for us to survive.

What Does A Farmer Do?

- There are various responsibilities within their particular field.
- Purchasing and planting of seeds on a cash crop farm, the purchasing of quality breeding stock on an animal husbandry farm, on the diet and care of a specific type of livestock on an animal production farm.
- Farmers need wide knowledge, base of the agricultural industry as a whole.
