

CHICKENS

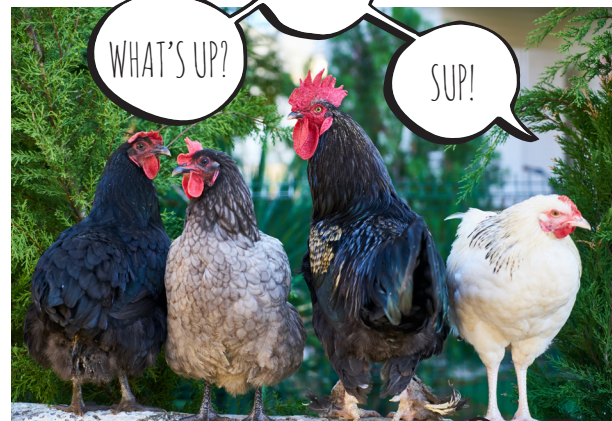

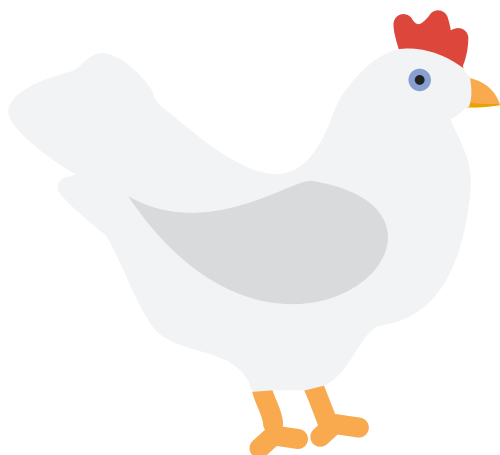

EARLY CHILDHOOD

Chickens are birds raised for meat and eggs. Chickens live together in flocks. Adult female chickens are hens. Adult male chickens are roosters. Baby chickens are chicks. Chicken eggs hatch in about 21 days.

Chickens like to scratch at the soil to look for seeds and insects. They also eat feed made of grain.

Some hens can lay over 300 eggs per year.

Eggs can be scrambled, fried, hard-boiled, soft-boiled, pickled, and poached.
