

HORSE

EARLY CHILDHOOD

Horses are used for work, riding, and sports. There are many different kinds of horses. They can be light horses, draft horses, ponies, or wild horses. Horses are many colors. They can be solid or a mixture of colors. Most horses live to be 20-25 years old.

Horses who work or travel on hard roads also need horseshoes for their feet. A farrier puts the metal shoes on the horse. Horseshoes help protect the horse's hooves.
