Lifecycle of Cotton Plants

Did you know?
Cotton is the State Fiber

Where is cotton grown in Oklahoma?

- In southwestern Oklahoma, the region's warm climate, sunlight, and soil, provide ideal conditions for growth.
- Counties like: Jackson, Tillman, Harmon, Greer and Washita.

There are 150 yards of cotton in a baseball.

From planting to harvest, cotton provides thousands of Oklahoma jobs.

Cotton is used in clothing, home goods, cooking oil, livestock feed, and more.

Thomas Edison's first successful lightbulb used a cotton filament.

Cotton is typically planted in May and harvested in October and November.
