## Did You Know?

- Pigs are very similar to humans in organs, genes, and body systems, including hearts.
- Pigs have excellent long-term memory, and can navigate mazes, distinguish between different objects, and use tools.
- Pork is the world's most-consumed meat, about 36% of all meat eaten globally.

OKLAHOMA PORK COUNCIL

## By-Products from Pigs

Pig fats are used in soaps and cleaning products.

Leather goods like wallets, handbags, and shoes are made from pig skin.

By-products from pigs are used to make medications.

Gelatin made from pig skin and bones make marshmallows and other candies.

Pig hair is used in paintbrushes and hairbrushes.
