Soybeans

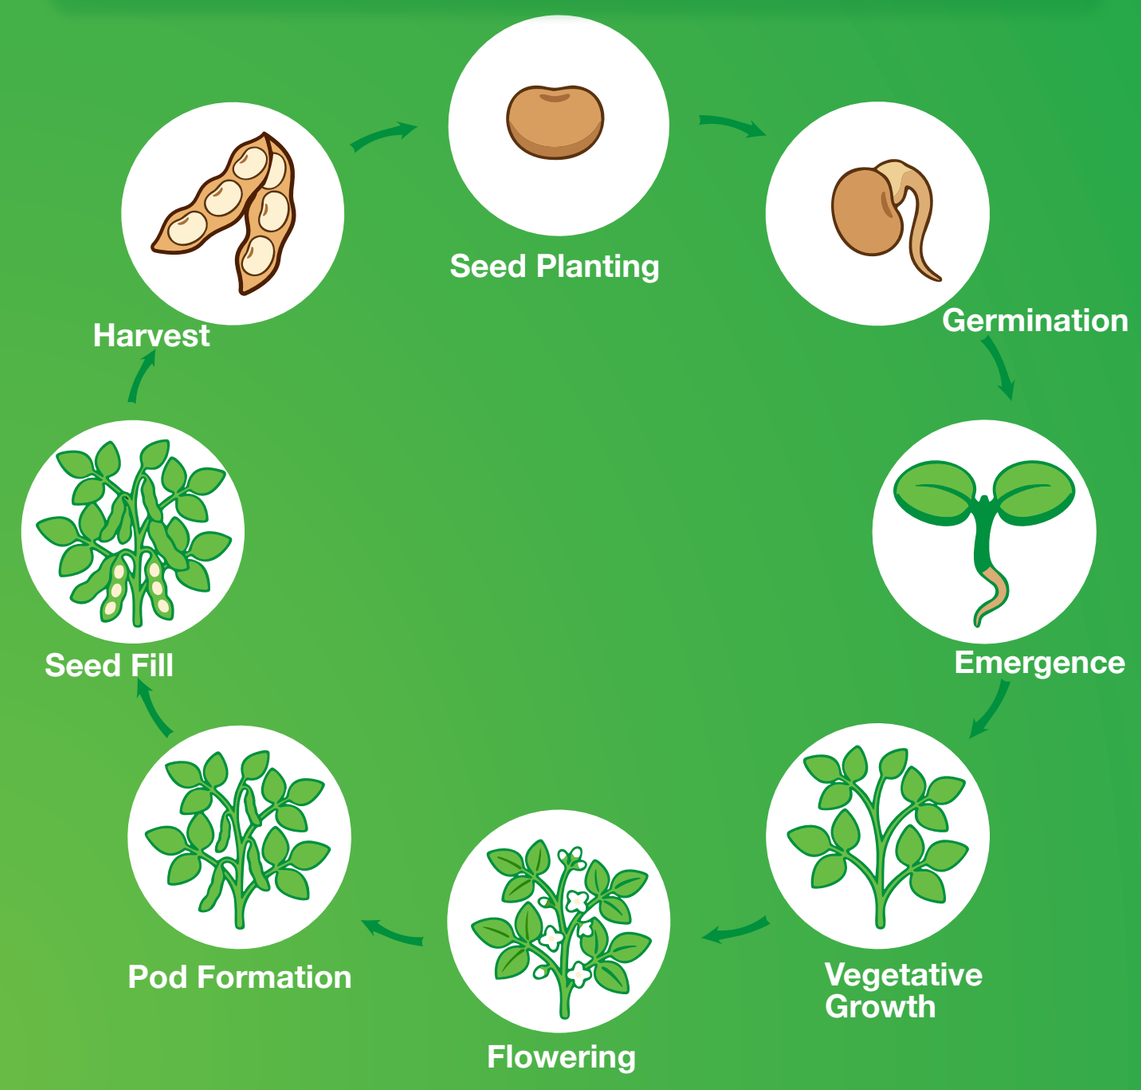

OKLAHOMA AG IN THE CLASSROOM

Where are Soybeans Grown?

Soybeans are grown in 29 states.
Most Oklahoma soybeans are produced in eastern and central Oklahoma.

Lifecycle of Soybean Plants

Uses of Soybeans

Feed

Soybean meal is a high protein ingredient used in livestock feed for cattle, poultry, and pigs.

Food

Soybeans are a healthy source of protein used in foods like tofu, soy milk, and edamame.

Fuel

Soybean oil is made into biodiesel, a renewable fuel powering trucks, tractors, and other vehicles.

Did You Know?

- Oklahoma soybeans are usually harvested in late summer or early fall.
- Farmers often rotate soybeans with crops like wheat to keep fields productive.
- Research funded by soybean farmers helps develop new soy-based products and uses.
- Soybeans help improve soil health by adding nitrogen back into the ground.
