Sports
AND OKLAHOMA AGRICULTURE

OKLAHOMA AG IN THE CLASSROOM

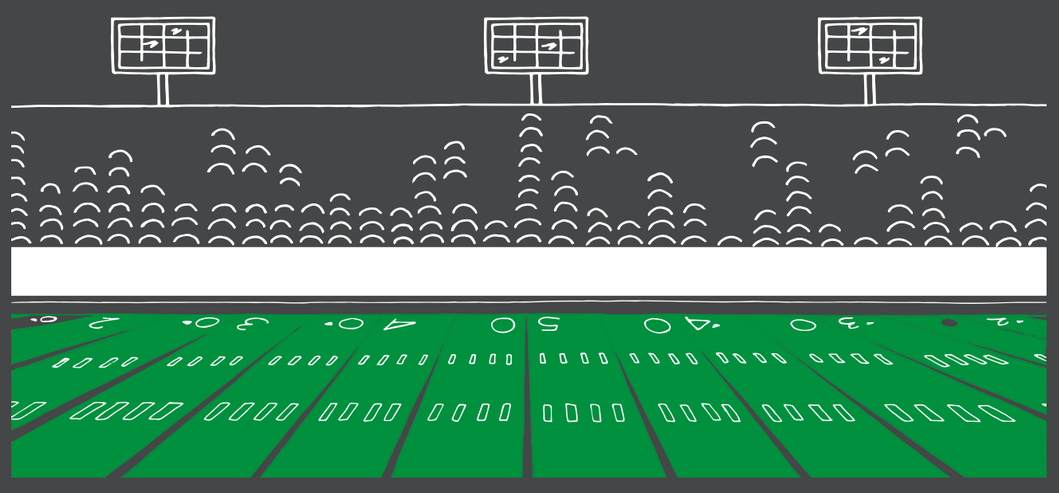

Equipment & Gear

Leather from cattle is used in footballs, basketballs, and baseball gloves, while wool from sheep are used in tennis balls.

Did You Know?

- Oklahoma is home to one of the nation's largest paper mills, turning trees and recycled materials into the paper used for sports tickets.
- Show rings and rodeo arenas use soil, sand produced and managed through Oklahoma agriculture.
- Every game day in Oklahoma starts with agriculture—from the grass on the field to the food in the stands.

Gaylord Family Oklahoma Memorial Stadium's field is natural Bermuda grass, supported by Oklahoma sod production and turfgrass research from Oklahoma State University.

Behind the Game

Bandages
Cotton gauze and can include plant-based materials used for stretch and adhesion.

Jerseys
Commonly made from crops like cotton and corn-based materials.

Socks
Made from fibers like cotton or wool to be durable and breathable.

Tape
Made with cotton fabric and adhesives from plant-based resins or by-products.

Vitamins
Derived from corn, soy, and other agricultural ingredients.

Fueling the Fans

Hamburger, Popcorn, Nachos

Beef, pork, dairy, and corn help fuel athletes and fans at tailgates.
