

Is it a bird or mammal?

Directions: Is the animal a bird or a mammal?
Write your answer under each picture.

BIRD

MAMMAL

It's a Bird, It's a Mammal, It's a Farm Animal!

Chickens are birds. They have feathers. Their babies hatch from eggs. Chickens do not make milk for their **chicks**.

Sheep are mammals. They have milk, hair, and wool. Their babies are born alive. They are called **lambs**.

Horses are mammals, too. Did you know horses have milk? Their babies drink it. A baby horse is a **foal**.

Turkeys are birds. They have feathers, like a chicken. A baby turkey hatches from an egg. It is called a **poult**. Turkeys do not drink milk.

Pigs also have hair. They have a litter of **piglets**, not just one baby. They make milk for the piglets to drink. They are mammals, too.

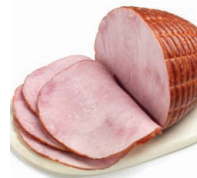

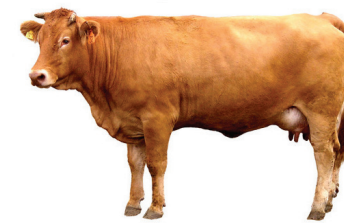

Cows make milk for their calves to drink. A cow and a calf have hair. The **calf** is born alive. Cows and calves are also mammals.

What other birds live on the farm?
What other mammals live on the farm?
