

## Earth City

If Earth's population of approximately 7.6 billion people was shrunk into a village of just 100 people, with all the human ratios existing in the world still remaining, what would this tiny, diverse village look like?

- 60 are Asian
- 16 are African
- 10 are European
- 14 are from the Americas
- 50 are female
- 50 are male
- 31 are Christian
- 23 are Muslims
- 15 are Hindus
- 7 are Buddhists
- 8 would believe in other religions
- 16 are not religious
- 14 can't read and write
- Only 7 would have a college degree
- 55 would live in urban areas
- 49 would have Internet connection
- 18 would not have electricity
- 9 live without an improved water source
- 32 live without basic sanitation
- 11 would live on less than \$1.90 USD per day
- 1 adult aged 15-49 has HIV/AIDS

If you keep your food in a refrigerator and your clothes in a closet; if you have a bed to sleep in and a roof over your head, you are richer than 75% of the world population.

If you have a bank account, you're one of the 30 wealthiest people in the world.
