

# DISCOVER PORK

Did you know pork is the #1 consumed animal protein in the world? In the U.S. alone, 22 billion pounds of pork are consumed each year!

## Comfort is Key

Like humans and other animals, pigs have four basic needs - air, water, food, and shelter. Pigs also need social interaction with other pigs, treatment for injury and diseases, and space to stand, stretch, and lie down. Barns protect pigs from weather, disease and predators. Farmers provide pigs with fresh air, clean water, nutritious food, and shelter.

## Everything but the Oink!

From food to medicine and medical devices, there is no other animal that provides a wider range of products for us than pigs. In fact, every ounce of a hog can be used to create 185 products!

**Eat up! Pigs eat a lot of feed and will grow to 270 pounds in just five months! Pig feed is made from corn and soybeans. It is formulated with animal nutritionists to ensure proper nutrients.**

- 🍌 Pork is an excellent source of protein, zinc, and vitamins B12 and B6.
- 🍌 Pigs can drink up to 14 gallons of water a day.
- 🍌 Pigs lack sweat glands.
