

# Corn Chopping

Fact Sheet and Talking Points

- The farmer is driving a combine, which is used for harvesting.
- Notice how the combine is shooting the chopped-up corn plants into the dump truck. The chopped-up corn will be used for animal feed.
- This is not sweet corn, the kind that people eat. Instead, this corn is grown to feed animals.
- There are many different varieties of corn, which can be used for many different products, even plastics and biofuel!
