

Farm Life 360

Overview and Direction Sheet

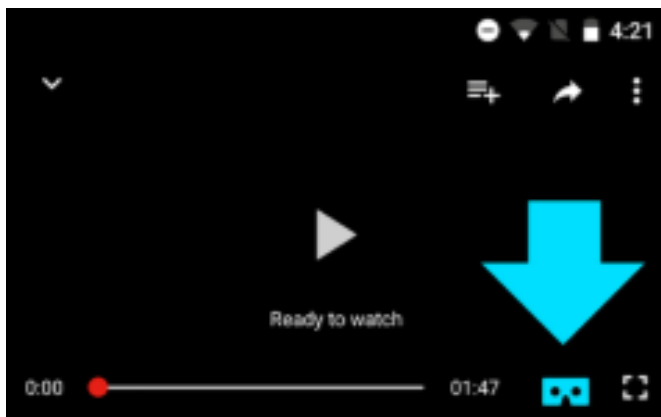

Agriculture in the Classroom is pleased to present 8 videos highlighting various Virginia farms and commodities. You can access the videos through YouTube. Simply search “Farm Life 360” in the top search bar and click on the channel to view the full list.

You can also access the videos directly from the AITC website, www.agintheclass.org. In addition to the videos, on our website you will find fact sheets for each of the videos to give you talking points. You can also find suggested follow-up activities.

The videos may be viewed through any internet connected device – phone, computer, or tablet. However, for a fully immersive experience, place your phone within a virtual reality viewer. Viewers are available on loan from AITC upon request. You must supply your own smart phone (not compatible with flip phones).

After loading the desired video onto your phone, click on the viewer icon in the bottom right corner (see image below) prior to placing in the viewer. When using the viewer, the participant can move around to see and experience a full 360 degrees. Instruct them to look up, down, and all around to take in all the sights.

It is not necessary to click on the icon when using a tablet or computer. If using a tablet, you can look around by moving your finger across the video. When using a computer, simply use your cursor to drag and explore.

Viewers can be wiped down with disinfectant wipes after use.
